ONE WRONG CLICK & THE WHOLE NETWORK GETS SICK

BEWARE OF UNSAFE ATTACHMENTS!

- Always be suspicious of unexpected attachments
- Ask yourself:
 - Why am I getting this attachment?
 - Did I give my home or work email to this vendor?
 - Did you REALLY use your work email for banking notifications?
- Consider verbal follow up with the sender (don't email)
- Immediately call the help desk/IT if you open an attachment and:
 - nothing happens
 - a black window appears and goes away
 - it asks you to "run" something
 - the document wants you to enable macros

WHEN IN DOUBT, THROW IT OUT
